

WRAPAROUND CABLE MARKERS KM

self adhesive, self laminating, square corners, precut

KM05025 wraparound cable markers hand-printing with permanent pens (see p. 70), are suitable for identifying large diameter cables, tubes and conduit. The procedure is quick - carefully hand print on the markable coloured area then wrap the marker around the cable/tube overlapping the clear part onto the marked area to protect it from water, alcohol, dust, and chemical and atmospheric agents. The fixing margin is important as it protects the marking from contamination by the hands. Many types of marking media can be used including pencil, ballpoint pen, marker pen, etc.

CERTIFICATES 

2011/65/EU

WRAPAROUND CABLE MARKERS **KM**

Technical characteristics

Min operating temperature range	-30 °C
Max operating temperature range	140 °C
Min application temperature	10 °C
Max application temperature	40 °C
Material	Soft PVC film
