

PROFESSIONAL SCISSORS SC

Designed for use by electricians. High hardness blades (56 HRC), one with a non-slip serrated edge, allow precise cuts to be made even on the more difficult materials.

To facilitate the stripping of conductors, a shaped cutting groove is integrated into both blades.

Dual compound plastic hand grips: durable and robust supporting structure made from Polyamide reinforced with fibre glass; soft rubber inserts to facilitate extra grip when needed.

PROFESSIONAL SCISSORS SC

Technical characteristics

Material (Blade)	Tempered steel
Material (Moulded)	Polyamide
