

# INSULATED HYDRAULIC CUTTING UNITS CP-W-KV

*GS approved*

These insulated cable cutting units can be used to safely cut copper and aluminium cables with nominal voltage up to 60 kV, where the absence of voltage cannot be guaranteed.

These units can be use both indoors and out, even in wet conditions when the temperature is between -20°C and +40°C.

Do not cut cables with special armour.

CERTIFICATES 

 GS ET 13045
