

## UNIVERSAL PLIERS UPC

The design of Cembre insulated pliers and the use of dual-compound plastic material in the handle cover optimise the distribution of the force over the entire surface in contact with the palm of the hand.

This leads to:

- > A reduction of the effort applied
- > A greater transmitted force
- > Safer grip
- > Prevention of injury to the fingers between the handles

As for all Cembre insulated tools, each individual pair of pliers is tested in accordance with EN 60900
