

# HYDRAULIC PRESSHEAD RHU1000

## *general features*

RHU 1000 is a 1.100 kN hydraulic presshead for full tension, transmission and substation connections, complete with quick automatic coupler for connection to hydraulic pumps with a working pressure of 700 bar max.

The standard version must be operated by a single acting pump; possibility to convert from single to double acting by substitution of the breather valve with a female quick coupling. RHU1000 will accept all semi-circular slotted dies common to most 100 ton heads as the Alcoa ones.

The die cap is removable for an easy connector positioning; the upper part of the cap automatically rotates during the die changing process to present the correct positioning of the die.

Lifting eye included.

# HYDRAULIC PRESSHEAD RHU1000

## *Technical characteristics*

### PROPERTIES

Width	278 mm
Length	414 mm
Weight	50.6 kg
Nominal pressure	700 bar
Force developed	1100 kN
