

## PIPE WRENCH WPC250-KV

The design of Cembre insulated pliers and the use of dual-compound plastic material in the handle cover optimise the distribution of the force over the entire surface in contact with the palm of the hand.

This leads to:

- >A reduction of the effort applied
- >A greater transmitted force
- >Safer grip
- >Prevention of injury to the fingers between the handles

As for all Cembre insulated tools, each individual pair of pliers is tested in accordance with EN 60900

## PIPE WRENCH WPC250-KV

### *Technical characteristics*

#### PROPERTIES

Material (Body)	Special steel
Material (Moulded)	Bicomponent plastic grips
Colour	Black-Blue
Length	250 mm
Head width	29 mm
Spessore_testa_mm	7.7 mm
Weight	380 g
