

Environmental Policy

Cembre recognises its compliance obligations and the contribution it can make, to minimise, any adverse impact, its activities may have on the environment.

The company's environmental policy underpins its commitment to environmental protection and the community at large.

To achieve this, the company implements an Environmental Management System in accordance with BS EN ISO 14001: 2015; sets objectives and ensures, adequate provision of resources:

- Maintain certification to BS EN ISO 14001:2015
- Comply with all applicable compliance regulations
- Conduct appropriate Risk Assessments and implement emergency procedures
- Conserve energy
- Manage the purchase, use and storage of materials to reduce environmental impact
- Where possible use suppliers who are accredited BS EN ISO 14001:2015
- Manage waste by reducing, re-using, recycling and disposing of waste in a responsible manner
- To protect the environment, including the prevention of pollution
- Add value and improve efficiency
- Take environmental considerations into account regarding investment decisions
- Take environmental considerations into account during the product design and development process
- Promote a wider understanding of environmental issues among employees
- Seek continual improvement in key areas.

The Managing Director is responsible for formulating and implementing the policy. This statement is fully supported by the Company Directors and sufficient resources shall be made available, in order to implement the policy.

Robert Smith
Operations Director

Ben Davies
Managing Director
