## CEMBRE SYSTEMS FOR ELECTRICAL PANELS

## CEMBRE SYSTEMS FOR ELECTRICAL PANELS

CEMBRE is able to provide quality solutions for creating **electrical panels for industrial control and automation** in the civil and industrial sectors, including:

**food, chemical, energy production, pharmaceutical, railway, manufacturing, mechanical, marine, plastics.**

A wide range of CEMBRE products related to supply demands for control and automation panels such as:

- **chain terminals** have been designed to allow the rapid and reliable execution of wiring in series.
- **hydraulic or pneumatic presses**, allow large volumes of connectors to be quickly compressed, eliminating any exertion or fatigue experienced by the operators when using the traditional manual tools.
- **various models of cordless tools**, easy to handle and light weight, allowing you to operate the tool with one hand.
- **industrial marking and labelling solutions** for push-button panels, terminals, modular components and panel exteriors.

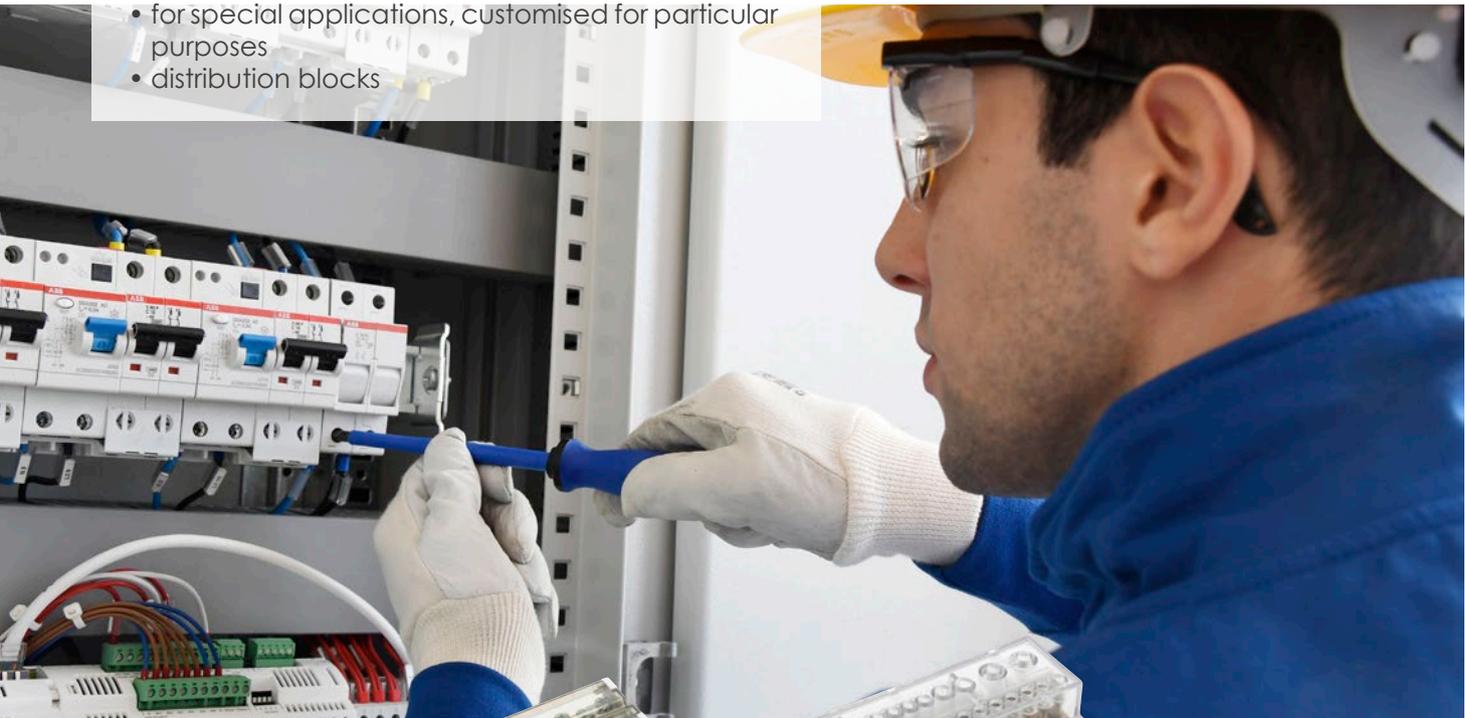

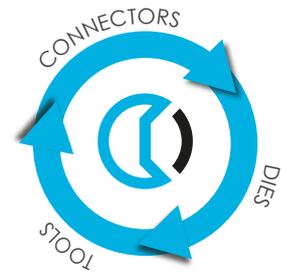

# CONNECTORS & DISTRIBUTION BLOCKS

CEMBRE produces various ranges of **copper and aluminium connectors** for different uses:

- uninsulated or pre-insulated for plant and control panels, for use with low voltage cables with sections between 0.25 and 1000 mm<sup>2</sup>
- for medium voltage cables
- for shunts and earthing networks
- bimetallic for aluminium cables
- for special applications, customised for particular purposes
- distribution blocks

## MECHANICAL, PNEUMATIC & HYDRAULIC TOOLS

CEMBRE manufactures **mechanical, pneumatic and hydraulic tools for crimping, cable cutting and hole punching**. The hydraulic tools are available in manual or battery operated units with crimping force from 15 kN to 130 kN. CEMBRE also offers crimping heads from 50 kN to 1100 kN of force and pumps developing 700 bar.

## 18V CORDLESS TOOLS SMARTOOL TECHNOLOGY

At the touch of a button, new CEMBRE 18V **crimping tools display real time data on the integrated OLED screen including:**

- pressure & force validation during the current operating cycle
- no. of cycles performed & remaining to recommended maintenance
- battery status

For added convenience, by connecting a tool via USB to a SMARTOOL enabled PC, the user can view and download data stored on the control card and:

- Monitor tool status
- Analyse operating performance
- Output validation reports
- Update firmware

## CABLE GLANDS & ACCESSORIES

CEMBRE produces an extensive range of cable glands and accessories in various plastic materials, brass and stainless steel for control panels and engineering applications.

## PROFESSIONAL TOOLS

For every professional, using quality products for each job is essential; CEMBRE, always attentive to the needs of the electrical sector, presents MARKETline - a single source portfolio of supplementary products for the commercial and industrial installer.

# IDENTIFICATION & LABELLING SYSTEMS

Thermal Transfer Printer  
MARKINGENIUS® MG3

**MARKINGENIUS® MG3** is a high resolution plug&play flat bed printer based on thermal transfer technology, capable of producing tags for cables, pipes and tubes; terminal block markers and legends and labels for all electrical panels, components and equipment.

**ROLLY3000** is ideal for printing all Cembre flat material on rolls, eg. cable tags for holders, tie on, wraparound cable markers, legend strips and labels.

Thermal transfer printer
