UK

CEMBRE

Whatever the type may be, the cable is the central element around which the CEMBRE offer revolves.

In fact, for over 50 years CEMBRE has been designing and manufacturing **systems for connecting and labelling cables**, both in copper or aluminium for the transmission of electricity and in optical fibre for data transmission.

Both types of cables are present in DATCOM applications, which are divided into BUL (ultra broadband) installations nationally, **shelters** and **data centres**.

CEMBRE offers itself as a partner to assist its customers in selecting the best product for **labelling fibre optic cables that require special care and attention** due to their very fragile nature.

The CEMBRE catalogue offers a range of solutions from latest generation thermal transfer printers (sheet or roll media) to fully portable printers. The offer is completed by various types of tags and labels to ensure the cable system is kept safe and organised.

Choosing CEMBRE means opting for a complete system consisting of a printer, ad hoc consumables and software as well as decades of expertise and high quality service.

MG4

TOP PRECISION AND PRINT QUALITY

The MARKINGENIUS® MG4 is the latest CEMBRE solution for industrial labelling designed to offer a **very high and long-lasting quality print for text**, logos, electrical symbols, QR codes and all kinds of vector images.

Equipped with a **ribbon save system**, a useful function that allows you to consume only the ribbon needed for printing.

ROBUSTNESS AND CONNECTION ALWAYS WITH YOU!

Its reliability and robustness mean that the MG4 can be used intensively, making it suitable for all kinds of applications.

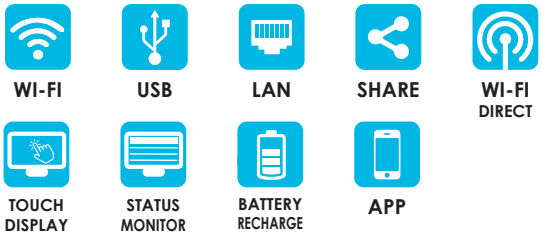
The large touch screen enables quick and easy management of print projects

ALWAYS CONNECTED!

Today everything is connected, even MG4!

The printer has many functions that facilitate connectivity and remote data exchange.

- **connected to the network** via USB, LAN and even Wi-Fi
- **connected to mobile and fixed devices** in the absence of a network via Wi-Fi direct: you can create the project in the office and send it to your mobile phone via messaging systems



FLEXIBLE MANAGEMENT OF WORK

With MG4, projects can be set up and created from a PC with the GENIUSPRO software for managing production orders or, if necessary, via the **GENIUSPRO Mobile App** developed by CEMBRE for IOS and Android devices (smartphones and tablets) for the latest changes on site on the electrical panel or on board the machine.

GENIUSPRO SOFTWARE

15 years of continuous development resulting from collaboration with our customers

Always up-to-date software, technical support and training

Import from 11 CAD + Excel software

19 languages available

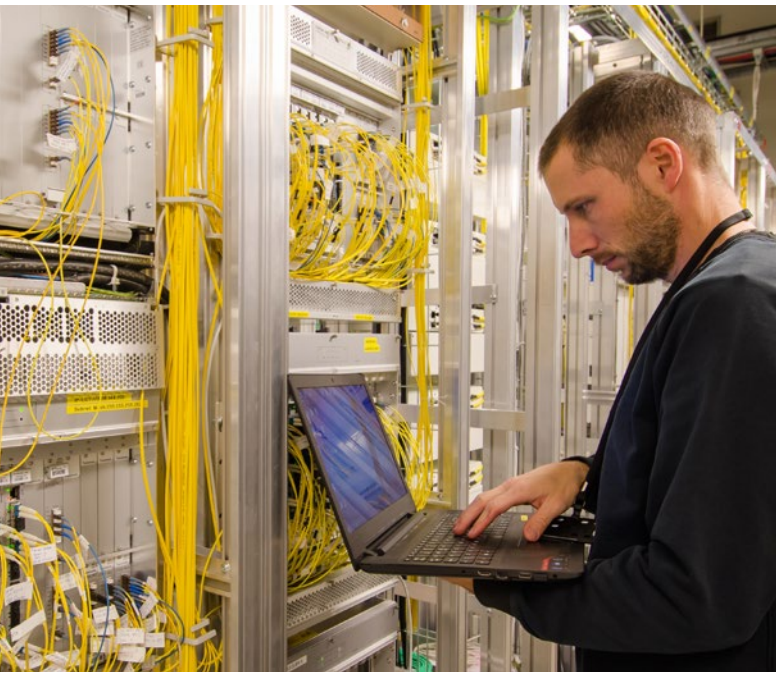
QUALITY AND RELIABILITY

ROLLY3000 is a thermal transfer printer for roll media, is easy to use, silent and reliable. Suitable for intensive use, it allows you to print large quantities of labels in no time. The high quality printing guarantees indelibility and resistance of the labelling over time.

In addition to the USB interface, it also has an Ethernet and a wireless network connection, allowing for considerable ease of installation and versatility of use even in different workstations simultaneously.

TECHNICAL ASSISTANCE

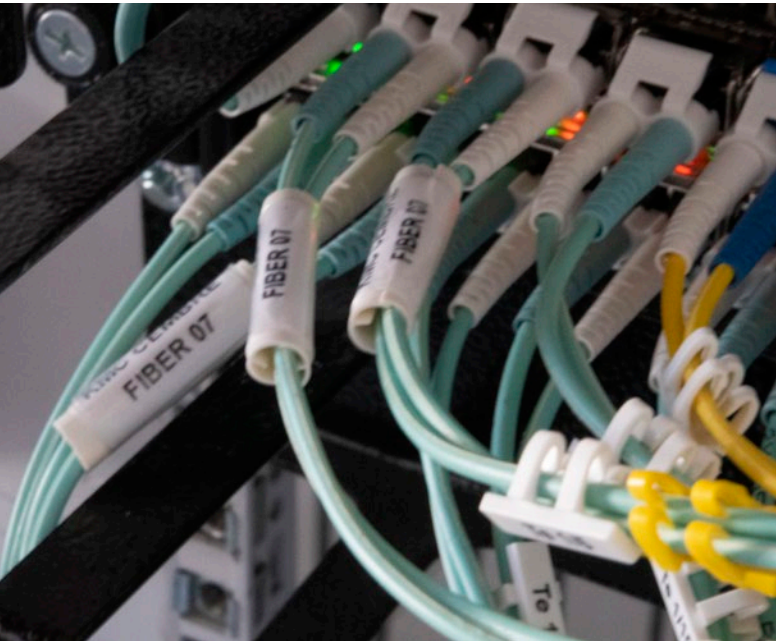
- Free software updates
- Practical trials before purchasing
- Free training and technical assistance: on site, by telephone and remotely through the website
- Tag and label samples available for customer testing and approval.
- Graphic creation for tags on the outside of the panel.



KMC . TUBE FOR OPTICAL FIBRE

- facilitates the wrapping of self-laminating cable labels
- in flexible PVC
- longitudinal opening for installation in new and existing wiring

ENTER | ATTACH | ROLL-UP



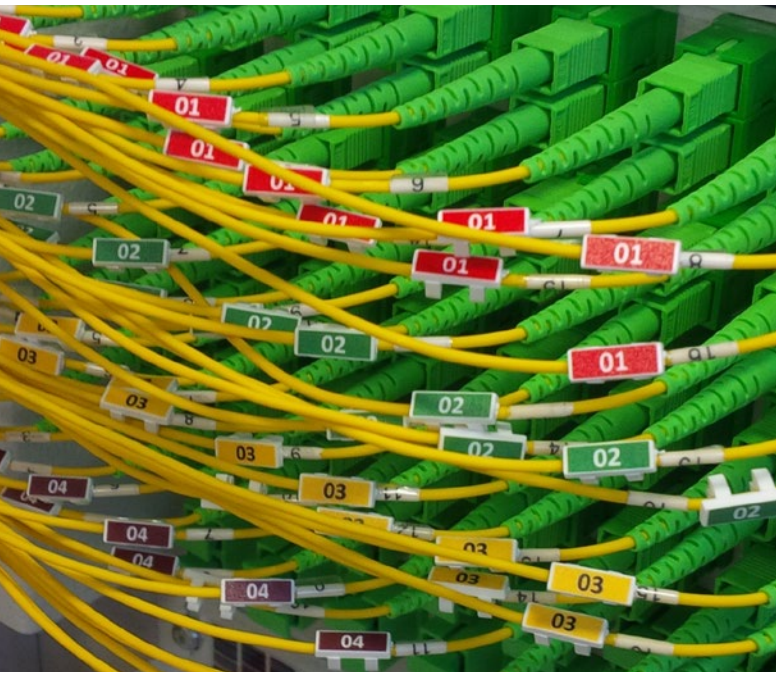
KM-ROLL . MG-KMP . WRAP-AROUND LABELS
BUL (ULTRA WIDE BAND) PRINT PREVIEW

- wrap-around labels for cables and wires
- ideal for identifying multi-fibre cables.
- reduced size on the cable
- available in various colours

- customisation available with the logos of the main Telecom operators

MG-ETF . ETF-ROLL. CABLE MARKER TAGS WITH CABLE TIES

- available for printing on MG-ETF sheet and ETF-ROLL
- ideal for marking large diameter cables
- for labelling TELCO type cables
- material in SBS, PC and TPU
- simple to apply
- available in various colours
- can be applied to new or existing wiring



MG-TDMO . CLIP ON CABLE LABEL

- they do not need a transparent tube
- essential for in situ cabling within optical fibre patch panels
- available in different clip sizes
- easily adaptable to cables of various diameters
- available pre-printed in colour, according to the standards of the operators
- to label new and existing wiring

MG-VYT . TTL . MULTIPURPOSE ADHESIVE LABELS

- with high stability PVC outdoor
- acrylic adhesive
- excellent resistance against chemicals, heat and UV rays
- enhanced indelibility of customisable labelling
- wide range of sizes available
