## N-M

### *Technical characteristics*

|   |   |
|---|---|
| Dimensional form                        | Ring terminal                               |
| Min operating temperature range         | -4 °F                                       |
| Max operating temperature range         | 239 °F                                      |
| Max operating temperature range (surge) | 266 °F                                      |
| Material (Body)                         | Tinned electrolytic copper electrolytically |
| Material (Partially reinforced)         | Polyamide PA6.6                             |
