

## SUPPORT TROLLEYS CS-SD

The support mechanism, which secures the portable drilling machines SD-15P-ECO, SD-10E-110 and the portable impact wrenches NR-11P and NR-13E-110, incorporates a gas pressure spring to give a constant, balanced control to the machine during operation. Fitted with insulated wheels, the trolley does not interfere with the track electrical circuits. The trolley is easily closed and can comfortably be carried by a single operator. The CS-SD standard version is suitable to work on standard gauge rails (4ft 8.5in), while the CS-SD-TA is the adjustable version suitable to cover gauges from 3ft 3.4in to 5ft 7in.
